# Fusion Cad Editor Update Instructions

- Download the latest update Files at CLNofSFL.com.
- Extract or unzip the files to your desktop for easy access.
- Double click on the folder to see the extracted files.
- Double click the latest file called cadeditorx14\_clnofsfl.ZIP
- Double click setupen.exe.
- If you receive a Windows Protection message that is preventing an unrecognize app from starting. Click More Info then Run Anyway.
- Give it time to extract all the files and start the install wizard.

- Click run then click ok or next for everything, but this screen.
- Uncheck the boxes then click finish. If you did not uncheck the boxes, then just close the editor screens, it's not a big deal.

#### Cadxeditor settings.

- Theses settings should be set when you updated the Cadxeditor. However, you must double check the settings to be sure that they are correct.
- Press reset on the side on the machine and then start the fusion program.
- Right clicking in the screen then go to options.

• Go to common and set the color to black

- Check the Step Bend in the Settings.ini file
- Close the Fusion Program.
- Go to the windows explorer. Go to C:\Users\Users\AppData\Roaming\CADSoftTools\CADEditorX 14
- If you created a new user for the computer. You have to go to this location C:\Users\?????\AppData\Roaming\CADSoftTools\CADEditorX 14
- Open Setting.ini file with note pad. Scroll down until you find [StepBend]. Make sure that they are set just like the example below.

[StepBend] Angle=20 Ext=0.125 Line=0.75

SubAngle=130

- If your tool bar doesn't look like this one here, do the following. -
- The Cad Editor installer installs the background programs here C:\Users\Users\AppData\Roaming\CADSoftTools\CADEditorX14
- If you created a new user then you have to move Interface.XML to this location, C:\Users\?????\AppData\Roaming\CADSoftTools\CADEditorX14
