The Quick - Trim Notcher

Increases efficiency

This machine will take 2/3 less time to prepare a letter. Run the same plastic file that the router used. Use 1" or 2" Trim-cap and watch letters get produced in record time. Now all you have to do is glue them in place.

Safe and convenient

The return is notched with the correct amount of material that needs to be removed, with the articulating cutting wheel and the CNC motor, the computer will do the work for you. The reverse bends are mark with a small dimple, and the trim-cap is than cut from the coil.
